REACH

Dear Sirs,

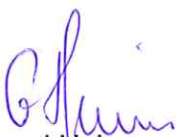

Please be informed that REACH, a regulation of the European Union for the **Registration, Evaluation, Authorization and Restriction of Chemicals**, is valid since 01st June 2007. We as the producer of ESSER Fire Alarm Products and Ackermann clino Nurse Call Systems are aware of this responsibility and of the required pre-registration respectively registration.

We hereby confirm that we will start all requested processes to fulfill the legal requirements as supplier, distributor and user. A comprehensive project has already been started in cooperation with our suppliers to check the products which are sold in the European Union.

For the pre-registered products, there will be a "phase-in" status. Depending on the sales volumes, we will apply for a registration within the legal time frame. Up to now, it is not possible to make further statements regarding required registrations. Anyhow, so far we assume that none of our Products for ESSER Fire Alarm Systems and Ackermann clino Nurse Call Systems are liable to pre-registration respectively registration and therefore no product phase-out's are to be expected.

If you have any further questions, please don't hesitate to get in touch with us.

Best regards
Novar GmbH

Bernd Heinen
